EDUCATION

University Of North Carolina at Charlotte **Aug 2024 - Dec 2025(Expected)**
GPA - 4.0/4.0
Master of Science in Computer Science
Coursework: Data Structures and Algorithms, Database systems, Computer communication and Networks, Big Data Analytics.

SKILLS

- **Backend Skills**: Java | Python | Spring Boot | NodeJS | Express | C# | Data Structures
- **Frontend Skills**: HTML | CSS | JavaScript | React
- **Tools/Technologies**: MySQL | MongoDB | Git | IntelliJ | VS Code | AWS

EXPERIENCE

MOURI TECH. **India**
Software Engineer AUG 2022 – June 2024

- Collaborated with **Blackbuck's in-house team** to design and deploy **8+ scalable microservices** using **Spring Boot**, improving system scalability by **50%** and enabling seamless modular integration.
- Developed a **real-time vehicle tracking system** powered by **Kafka**, processing over **1M+ messages daily**, ensuring zero data loss and 99.9% reliability in inter-service communication.
- Integrated **Elasticsearch** to power advanced shipment search capabilities, reducing query response times by **40%** and enabling rapid retrieval of shipment data.
- Enhanced system throughput by **30%** through **Redis caching**, optimizing shipment and vehicle status updates and reducing database load.
- Automated deployment processes with **CI/CD pipelines**, accelerating release cycles by **60.**
- Delivered high-quality solutions with **85%+ test coverage** using **JUnit** and **Mockito**, significantly reducing production issues and improving system reliability.

PROJECTS

E-commerce Application using Spring Boot (In Progress)- Link

- Designed and developed a robust **ProductService** module in a Spring Boot-based e-commerce backend application.
- Implemented **RESTful APIs** to dynamically retrieve, update, and delete product information from the **FakeStore** website, ensuring seamless integration with external data sources.
- Leveraged Spring Boot's dependency injection to build a scalable and maintainable backend architecture.
- Enhanced system performance and reliability by implementing efficient **error-handling mechanisms** and data validation techniques.

E-commerce Application with Product Ratings and Cart Functionality using React and Redux - Link

- Developed a dynamic e-commerce application from scratch using React for front-end development and Redux for state management.
- Implemented a product rating system, cart functionality, and category-wise product display to enhance the user experience.
- Ensured a responsive and seamless interface for adding products to the cart, displaying ratings.Followed design principles by structuring the project with reusable React components, making the application scalable.

CERTIFICATIONS & INVOLVEMENT

- **Google Data Analytics** professional certificate by Coursera
- **Graduate Teaching Assistant** for Intro to AI course from (January 2025 -present)
- **Mess committee leader** in hostel, representing (60 + computer science students) from Aug 2018 - Aug 2019
- Led the core team responsible for organizing the cultural fest, Rhapsody (2019) with **500+** participants.
